EXPERIENCE

Web System
FitZone Fitness Center
📅 2024 📍 Galle

- Utilizes Java's OOP features (Classes, Objects, Inheritance, polymorphism) for modular and maintainable code
- Implements robust error handling mechanisms to prevent data corruption and provide informative error messages
- The Web System was built using HTML, CSS, JavaScript, MySQL, and PHP
- Features a visually appealing design that reflects the theme of FitZone Fitness Center
- Includes navigation menus to guide users through the website
- Provides information about the fitness center, its programs, services, and location
- Potentially includes an online membership registration or booking system

Title
Fixnow
📅 2025 📍 Galle

- Technologies: The Website was built using HTML, CSS, JavaScript, MySQL and PHP
- Developed a PHP and MySQL-based web platform for managing repair and maintenance service requests
- Enabling users to submit issues, track repair progress, and communicate with technicians
- Includes admin panel, user authentication, and real-time status updates

Title
Web System Pahana Edu Bookshop
📅 2025 📍 Galle

- The Website was built using React, Tailwind CSS, springBoot & mongo DB
- Developed a Java-based application to automate bookshop operations, including customer registration, order management, billing, and inventory tracking
- Features secure login, customer booking records, car and driver management modules, and user-friendly interfaces with proper validation and error handling

Mobile App
LuxeVista Resort
📅 2024 📍 Galle

- The Mobile App was built using Java and SQLite
- Visually appealing design that reflects the theme of LuxeVista Resort
- Navigation menus to guide users through the app
- Information about the resort, its rooms, services, and nearby attractions
- Options to browse and book rooms, reserve in-house services like spa appointments and fine dining
- User authentication for secure access and booking management

Trainee Software Developer
Amazoft(pvt)
📅 12/2025 - 06/2025 📍 Colombo, Sri Lanka

- Employee Management System
- POS System
- Company Website Redesign
- School Management System
- **Technologies:** PHP (Laravel), TypeScript, HTML, CSS, MySQL.
